*This is a higher than usual number because of the COVID-19 policy to not close cases unless we can verify they are out of state. Many of the PARIS matches researched and handled from March and June were still awaiting verifications and therefore cannot be closed. MDH and the LHDs have implemented an outreach project to complete action needed via telephone calls.

**Beginning in March 2021, E&E PARIS alerts include both LTC statewide and ABD Medicaid for LDSS that migrated from CARES to E&E.

***This covers Oct, Nov and Dec. 2021 and came from the drop of December 2021. The normal cycle is Dec, March, June, Sept, however the September 2021 file was loaded in October 2021.

Notes
The redet counts above reflect the number of Medicaid Assistance Units in Maryland Health Connection (MHC) and the Clients' Automated Resources and Eligibility System (CARES) that are scheduled for redetermination each month based on certification end dates. The counts are not estimations of the numbers of individual enrollees who will continue or will lose coverage at redetermination, as there may be more than one person in the AU and factors such as failure to renew or to return outstanding verifications may impact enrollment. The redet numbers may change on future reports due to adjustments made for early renewals and for other reasons. The CARES counts may overestimate the number of non-MAGI redets as the data includes certain groups, such as individuals receiving Supplemental Security Income (SSI), who do not need to renew coverage annually. The above counts in CARES do not include long term care cases, which now reside in MD Think. Depending on the the timeframe reported, the MAGI counts for the first month reported may be lower as individuals have started to do their redets and may be lower for the last month reported because it is to far out for the system to capture some redets.

Updated: 4/5/22 for Feb 2022 data

Definitions: **MAGI** = Modified Adjusted Gross Income, includes families with children, childless adults under age 65, etc.
Auto Renewals = CMS allows states to conduct auto-renewals, which means MHBE can use external data sources to confirm the eligibility criteria for consumers without having to contact them.
Manual Renewals = Consumers who could not be confirmed for eligibility using external data sources and were contacted by email and/or postal mail to file a renewal application.
